GREAT

BRITAIN & NORTHERN IRELAND

UK INWARD INVESTMENT NETWORK

OUR TEAM

GREAT

BRITAIN & NORTHERN IRELAND

UK Trade & Investment (UKTI) has continued to work with new and existing investors to ensure they are fully integrated into UK networks and UK market opportunities. In 2011/12, UKTI and its partners worked with clients across the world to make almost 85 per cent of the UK's foreign investment projects a reality.

Britain is a GREAT location to establish your international business and grow globally. My teams at home and in 33 markets around the world are here to support you. Key contacts are set out in this book to show you how to reach us.

We look forward to hearing from you and helping you access the clear commercial value that a UK presence can add to your global operations.

Michael Boyd
Managing Director,
Strategic Investment

ABOUT OUR NETWORK

UKTI provides a UK-wide and global inward investment service.

The Strategic Relations team is improving the customer journey by bringing best practice from the private and public sector to UKTI's relationships. We help companies navigate government and the UK business environment. We engage with global businesses in a way that recognises their complexity and helps build their business success.

UKTI's 'Investment Hub' in the UK is at the centre of this. Our global network is present in 96 markets, with dedicated investment teams in 33. We have a close partnership with the devolved administrations in London, Northern Ireland, Scotland and Wales, as well as local economic development organisations throughout England.

UKTI Investment teams work with technology and sector specialists who bring experience and credibility in their fields. They combine commercial acumen with technical expertise to enable UKTI to engage effectively with investors who need to make decisions about the best place to source their R&D operations or obtain high-level skills or high-value components.

ONLINE: UK MAP FOR INVESTORS

The UK Map for Investors pulls together data to help international companies make informed decisions on where to invest in the UK.

It has two research channels - 'National data' and 'FDI flow data'.

'National data' allows a user to search for sector and sub-sector information. Here you will find examples of companies, universities and centres of excellence across the UK and across different sectors. You can also see the density of companies, employment and student numbers on heatmaps relevant to your business.

If you want to see heatmaps showing the volumes of FDI in the UK by sector, business activity (including R&D and headquarters) then look at the 'FDI flow data' area.

Cumulative searches on multiple data points makes this a sophisticated tool for potential and existing investors.

All the data featured in the map is in the public domain and set out in the 'data sources' sub-menus.
