

KAZAKH NUCLEAR ENERGY FORUM 2010

Building International Strategic Partnerships

London 20 & 21 September
Central Hall Westminster

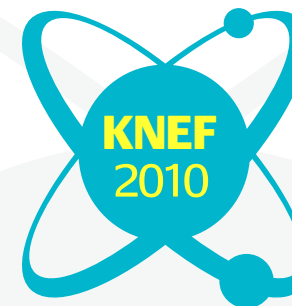

The forum, an official Government of the Republic of Kazakhstan event in partnership with Newsdesk Media Group and in association with Kazatomprom, is entitled:

Building International Strategic Partnerships.

Already the world's largest producer of uranium, Kazakhstan is set to become one of the world's leading players in the global nuclear energy industry and 2020 could see the country as the source of around one-third of the world's uranium exports.

As part of its overall industrial development strategy Kazakhstan is seeking to maximise the potential return of its uranium deposits by focusing on the manufacture and sale of value added uranium fuel pellets and investing in nuclear power generation capacity, both at home and in foreign energy markets.

This major forum will provide attendees with a deep insight in to Kazakhstan's current and prospective plans to develop all aspects of its nuclear industry and provide direct access to leading government ministers and Kazatomprom officials during two days of intensive briefings and dialogue.
